- Supports multiple room types, arrival dates and departure dates in a **single booking**
- Automated Rewards and Redemption **consumer loyalty system**
- **Compare** third party intermediaries during the booking process
- Book **different rate plans** on **different days** during the same stay
- Client-driven **dynamic packaging** options

About RoomRez

RoomRez was originally developed in 1999 in response to the demand from hoteliers for a flexible and functional web booking system. Version 2.0 of RoomRez was deployed in 2007 to add enhanced functionality and simplify integration to strategic partners in Channel Management, GDS Distribution, Revenue Management and Property Management Systems. RoomRez is the pre-eminent hotel web booking system available on the market today.

RoomRez Value

- Integrates with leading **Property Management System** suppliers
- Available for a fixed **monthly fee** without escalating commission-based charges
- Graphical **dashboard reporting** provides quick analysis of booking trends and results

RoomRez Integration Partners

RoomRez integrates with leading solution providers in the following disciplines:

- Channel Management (EZ Yield)
- GDS Distribution (GDSConnect)
- Property Management Systems
